Cool mechanics! The fighting could be a little smoother/slower on the enemy part but HOLY ♥♥♥♥ is it fun! Also runs much better than most games i've played performance wise.

P.S The egyptian level is insanely scary and difficult. I love it. I wish there was more ancient egypt VR stuff.. I had high hopes for this game it disapoint!

2/10

Was a game. Crap. The RNG ♥♥♥♥s you and avoiding obstacles is guess work. If you like assembly line game this could be good its ok now but still getting updated unlike most ea games. Is prettty awesome! Try it out!. Ohhhh what a wonderfull game... such an incredible experience.

The game itself is not hard or annoyng, but the missions are not there to make it easy... get to high numbered combos and shoot a single ennemie after 50 combo... stuff like that makes the game fun to play.. for an arcade I played for a lot of time, even tho you are kind of doing the same thing, you are always something different. The graphics are just the best and even the soundtrack is good. I have to admit you can get a little♥♥♥♥♥♥♥♥of but it is incredibly fun. I tootally recomend it. btw there are a lot of references if you are into that

Pros: Decent Graphics

Cons: Everything else. I have thoroughly enjoyed this game and still do whenever I play it. This game has been plagued by bugs from the start and a few tend to pop-up every now and then after a new patch, but it's pretty much bug free at the moment. The game has such a unique playstyle with a battleground consisting of four zones to put your cards in. Besides having to worry about your fortress' health, you also have to take the morale of your troops into account - losing too many valued troops will ensure defeat as much as the destruction of your fortress. Combined with the synchronised turn system this creates a tactical element and a mind-game that is unseen in other card games! The different factions have a truly unique playstyle and some of the animated cards are something to marvel at. The learning curve is rather steep but this just kept me coming back to the game to learn more about it and improve my playstyle and deckbuilding knowledge.

Give this game a try: play the campaign and some player matches with the free-to-play weekly decks and I'm sure you will be captivated by the experience.

. some people say this software sucks it doesnt ive done stuff i didnt even think i could do low selfasteem is mute here they teach u pretty much anything u can use ur ideas and put it into a game u can even put it on steam for people to play. Truly a great game in the making... plays great as is, keep the content and features coming

Updated Review

As Of Sept 08 2015 the dev has put alot of work into this, and it really feels like a complete game with single player modes, and a good variety of local multiplayer game modes. Great sountracks\effects and a good scoring system, every thing you need in a game that will keep you and friends entertained for hours, drifting away in deep space blasting way.. Fun little time waster that would fit perfectly on mobile phones...on PC it lacks controller support!. I'm a huge Terraria fan, and while there are several clone-esque games on Steam, this one stood out with it's focus on survival and small promise of a diablo-like progression. So far I've put a few hours into it and have really been pleased with the overall mechanics and presentation of the game. The systems are simple to use, but deep, the survival is challenging but not tedious.

Obviously I have a long way to go, but so far it IS following the Terraria formula where the game gets faster and less cumbersome as you enhance your skills\equipment so I feel like I'm headed for a faster, more combat-driven experience.. Loved the unicorn!!
